

STACKING AND STORAGE

Prepare freight for storage.

Purpose

This unit standard provides a broad introduction to the preparation of freight for storage, excluding bulk freight, within all modes of transportation. A learner accredited with this unit standard will be able to identify, determine, assess, record and store freight.

The qualifying learner will be capable of:

- Unpacking containers.
- Selecting/picking and sorting items.
- Identifying the storage method related to the item type.

SAQA ID: 252264

NQF Level: 1

Credits: 2

Accrediting SETA: TETA

Duration: 2 days

Recommended Entry Criteria

Grade 9

Certification Issued

Competency Certificate

Unit Standard Range

- The scope of this Unit Standard is for any person working in the transport environment where knowledge and application of preparing freight for storage procedures is a necessity.
- The context of this Unit Standard refers to aspects, practices and procedures involving the preparation of freight for transportation safely and economically.
- The level assigned to this Unit Standard is appropriate because a narrow range of knowledge and cognitive skills is applied. The application of this Unit Standard is to qualify the person for entry into a career-based certification.

Specific Outcomes

1. Unpack containers.
2. Select/pick and sort items.
3. Identify the storage method in relation to the item type.
